

FOCUS ON FURNITURE CASE STUDY

BOWEN STORAGE SUPPLIED AND INSTALLED A STOW PALLET STORAGE SYSTEM TO IMPROVE WAREHOUSE CAPACITY, EFFICIENCY, SAFETY AND PRODUCTIVITY FOR ONE OF AUSTRALIA'S LARGEST FURNITURE RETAILERS.

BOWEN[®]
STORAGE

CLIENT BRIEF

Focus On Furniture is an Australian-owned company dedicated to selling premium quality furniture, sourced locally and from around the world.

With over 16 retail stores and growing, Focus on Furniture needed a solution to improve storage capacity and efficiency for their new warehouse and distribution centre in Hallam – built specifically to better service Focus on Furniture stores around Victoria.

OUR SOLUTION

Stow pallet racking.

Easily implemented, cost-effective and robust quality storage.

In today's economic environment, quality and value matters! And that's precisely what Bowen Storage delivered with Stow pallet racking.

Working closely with Focus on Furniture, Bowen Storage supplied and installed a Stow pallet storage system to improve warehouse capacity, efficiency, safety and productivity.

Modular and flexible in design, Stow's structural components are rigorously tested to ensure a safe load capacity for goods of all sizes and weights.

Double deep racking provided over 9700 pallet spaces to maximise storage capacity and density, whilst allowing access to all pallets easily and efficiently.

In order to separate pedestrian and forklift traffic, heavy duty industrial post handrail was installed for walkways in the warehouse, vastly improving warehouse safety.

Rack protection guards were installed to prevent accidental damage from forklifts. Signage to show Safe Working Loads was fitted according to Australian Standards to ensure safe work practices were followed.

CLIENT RESULTS

The Stow pallet storage solution supplied and installed by Bowen Storage delivered time and cost savings for Focus on Furniture:

- Improved storage space and capacity from double deep racks (two pallets deep) enabling greater density of storage.
- Quick and easy access to stored product. Maximised storage density while maintaining good pick face access so that fork lift operators could retrieve back pallets by removing only one pallet in front of it.
- Improved operational efficiencies leading to better productivity and profitability.
- Enhanced customer experience. Better response times from warehouse to stores means better customer service and experience.

THE PARTNERSHIP

Bowen Storage worked personally with Focus on Furniture to deliver a quality, cost-effective robust storage solution – on budget and well ahead of time!

Our solutions focus and partnership approach enabled us to complete the project two weeks ahead of the agreed schedule.

Identifying the importance of returning to “business as usual”, the project was managed and run in two stages. This enabled Focus on Furniture to load their storage racks more quickly whilst minimising business and customer disruption.

Bowen Storage. Leading Workplace Solutions.
